Sinus bradycardia is observed in approximately two-

can serve as a differential diagnostic symptom. In the
majority of hemorrhagic nephroso-nephritis patients it
is functional in nature and is dependent on extracardiac
factors, especially on elevated tone of the vagus nerve.
In some cases sinus bradycardia may be dependent on

Investigations were made of the changes in the micro-
hardness of the petrographic components of a wide
range of coals of various Soviet origins. Measurement
of the micro-hardness was effected by means of the
PMT-3 instrument with an indenter load of 10 g. The
experiments were carried out in reflected light with
